

EXTRACURRICULAR TRAMPOLINE PROGRAM

MISSION We offer specialized therapeutic services for children during their first years in school or to facilitate the transition to school, by providing support to develop autonomy, consolidate academic prerequisites and reduce barriers to learning.

CLIENT School-age children **under 9 years old**
With an global delay, or an autism spectrum disorder.

OUR TEAM Specialized educator supervised by a supervisor, a speech-language pathologist, psychomotor therapist and behavioural analyst as resource persons.

OBJECTIVES

⇒ **Developing autonomy :**

- Take care of personal belonging,
- Develop organization to do school task independently

⇒ **Reducing the barriers to learn** Depending on the child, it could be as varied as:

- Develop imitation skills,
- Increase attention span,
- Reduce task avoidance behaviours.

⇒ **Develop or consolidate prerequisites for school**

- Expressive and receptive communication,
- Cognitive concept,
- Pre graphic design and fine motor skills.

OUR SERVICES Therapy is only available in individual session : one therapist for one child. The sessions last between 1h and 2 hour. The child receives between 2 and 4 sessions per week. The amount of time for weekly therapy is a function of the child's need and other factors (time of the class, familial logistic, etc.)

1 hour session	1:30 hours session	2 hours sessions
\$ 50 /1h	\$ 70/ 1h 30	\$ 90 / 2 h
